DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Thursday, 07 September 2023 at 06:00 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Widespread levels of Moderate air pollution are expected today across much of England and Wales, exacerbated by the continued continental feed of air and very warm or hot and humid conditions. Although lower levels are likely across Scotland, Northern Ireland and parts of northern England.

Tomorrow: Levels of Moderate air pollution are expected to be more widespread on Friday as light winds and very warm conditions persist. High levels of air pollution may be reached, mainly for Northern Ireland and around busy population centres across England.

Outlook: Widespread Moderate levels of air pollution across England and Wales Saturday, with High, perhaps locally Very High levels being reached in some central and eastern parts. Air pollution levels looking to reduce from Sunday, becoming Low as more unsettled and cooler weather begins to spread southeast across the UK.
